Brent,

I had a plan for 2/17 and will be off that day. If the outcome of the presentation results in any change of the draft permit, we can make changes accordingly after ORC and EN review the package and before Bill signs it.

Isaac

Importance: High

Howdy Y'all:

The OOC is proposing 2/17, 22, or 23 to come brief us on offshore fracking – which we know folks will be interested in this time around (esp. Center for Biological Diversity). This would probably be a good thing to know prior to proposal of the OCS permit. I would like to do it on their earliest date Friday 2/17. This could, however delay getting the proposed permit ready to go out.

Thoughts?

Takk,

Hi Brent....Good morning, I hope you had a nice weekend.

Any thoughts on the below dates? We want to make sure we can coordinate travel accordingly.

With the new administrative and things the way there are currently, are you folks even going to be able to meet with us this soon?

Thanks and I look forward to the response,
James

Brent,

I have checked with the main players for some potential dates for the Fracking presentation we discussed the other day.

We would like a time slot of 2-3 hours for the presentation and discussion...meeting start would be 1-130 PM.

Here are the dates:

- Feb 17
- Feb 22
- Feb 23

Please let me know the soonest what today would work the best so we can get it scheduled.

Thanks and I look forward to hearing back from you,
James
